

HOW TO SET UP A PROJECTOR USING AN HDMI CABLE

Home cinema is becoming more and more popular. That's understandable because having your movie or TV viewing significantly enhanced whilst having the rest of your home comforts at your fingertips has to be a good reason to stay in. Here are a few basic steps to get you set up and ready to watch your favourite programs on the big screen at home.

It should take under 30 mins

Ease

WHAT YOU'LL NEED

HDMI cable

The Knowhow

- Turn the projector off, then find the HDMI input and insert the cable
- Connect the other end of the cable to your set-top box
- Turn the projector on again and use the input or source menu to select the HDMI port. The TV image will appear when you've got the right one

It really is that simple. Now all you need is the popcorn.

Always refer to the manufacturer's manual for specific details.
